About me

I am a first-class honours Computer Science student with a flair for developing technical solutions to client challenges. Whether it's creating a bespoke website or using key OO practices to ensure optimum application maintainability, I enjoy working as part of a team to really crack a client brief.

Throughout the course of my degree I have developed a high level of technical capabilities (I am adept in WordPress, php, Java, C#, Python and standard web languages). My time studying, combined with my industry experience, has taught me the time-management, organisational and communication skills needed to add value in your company.

Web Developer at Tru Digital

September 2018 – February 2019

- › Creating modern, responsive and entirely bespoke websites
- › Keeping strong communication leads to clients to get feedback and update them on progress
